nist s manufacturing engineering laboratory mel is developing
standards that promote interoperability among members of the u s
automotive supply chain this study assesses the costs of imperfect
interoperability to the u s automotive supply chain and describes
the sources of these costs this study estimates that imperfect
interoperability imposes at least 1 billion per year on the members
of the u s automotive supply chain by far the greatest component
of these costs is the resources devoted to repairing or reentering
data files that are not usable for downstream applications
