accompanied partition have remained blanketed in silence and yet in private the voices of partition have never been stilled and its ramifications have not yet ended urvashi butalia s remarkable book the outcome of a decade of interviews and research looks at what partition was intended to achieve and how it worked on the ground and in people s lives pieced together from oral narratives and testimonies in many cases from women children and dalits marginal voices never heard before and supplemented by documents reports diaries memoirs and parliamentary records this is a moving personal chronicle of partition that places people instead of grand politics at the centre these are the untold stories of partition stories that india has not dared to confront even after fifty years of independence

silence is not simply the absence of noise it is within us in the inner citadel that great writers thinkers scholars and people of faith have cultivated over the centuries it characterizes our most intimate and sacred spaces from private bedrooms to grand cathedrals those vast reservoirs of silence philosophers and novelists have long sought solitude and inspiration in mountains and forests yet despite the centrality of silence to some of our most intense experiences the transformations of the twentieth century have gradually diminished its value today raucous urban spaces and a continual bombardment from different media pressure us into constant activity we are losing a sense of our inner selves a process that is changing the very nature of the individual this book rediscovers the wonder of silence and with this a richer experience of life with his predilection for the elusive corbin calls us to listen to another history
