avenues of the human spirit takes us on a compelling journey through many life changing experiences towards a greater sense of spiritual fulfillment

genuine life changing experiences such as perceptions through time out of body experiences and a profound spiritual awakening illustrate how the author reached a philosophy of benevolence and freedom that we too can draw upon in our everyday lives these avenues of the human spirit are the ecstatic changes we can experience beyond our bodies in deep meditation or removed from the everyday world in nature but they are also the everyday choices we make that define our world the author's spiritual awareness has also grown from an understanding of the spectrum of human experience from the harsher sides of his childhood in working class london to the joys of spiritual exploration the result of these combined perceptions is what makes avenues of the human spirit a unique and life affirming book

this book suggests that religion in its usual sense can be replaced by something better that the human spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can the book breaks new ground in suggesting a radical alternative to religion it offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions it also challenges current views of

causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality it develops and elaborates a notion of the noosphere within a theoretical system this enables the notion to assume a scientific importance which it currently lacks because it is treated as an isolated eccentric and rather mystical idea
