The Paris Agreement on Climate Change

2017

the Paris Agreement fundamentally alters the reach and scope of the international climate change regime this book provides the first legal commentary to the agreement's articles putting them in context and detailing how they are to be understood and put into action

Circular Economy and the Nordic Swan Ecolabel

2017-09-20

the transition to circular economy necessitates right incentives for choosing products and services with lower environmental impacts in the form of price signals and sufficient environmental information an ecolabel indicates that the product is environmentally speaking among the best products available on the market and thus has the role to steer stepwise developments towards sustainability the Swan criteria promote quality products with requirements on durability and the use

of secondary raw materials to further align the criteria with circular economy future criteria development might focus more on aspects including upgradability reparability multi functionality component reuse and innovative forms of consumption and production this report was prepared as part of a nordic project and the results could be useful in the development of the nordic ecolabel in the future

Quick Revision for Financial Accounting (For ICWA Intermediate: Paper 5)

2016

tulsian s quick revision for financial accounting is a self study handbook loaded with practical questions this book is a perfect revision text comprises structured questions based on pattern and scheme adopted in examinations

as humanitarian needs continue to grow rapidly humanitarian action has become more contested with new actors entering the field to address unmet needs but also challenging long held principles and precepts this volume provides detailed empirical comparisons between emerging and traditional humanitarian actors it sheds light on why and how the emerging actors engage in humanitarian crises and how their activities are carried out and perceived in their transnational organizational

environment it develops and applies a conceptual framework that fosters research on humanitarian actors and the humanitarian principles in particular it simultaneously refers to theories of organizational sociology and international relations to identify both the structural and the situational factors that influence the motivations aims and activities of these actors and their different levels of commitment to the traditional humanitarian principles it thus elucidates the role of the humanitarian principles in promoting coherence and coordination in the crowded and diverse world of humanitarian action and discusses whether alternative principles and parallel humanitarian systems are in the making this volume will be of great interest to postgraduate students and scholars in humanitarian studies globalization and transnationalism research organizational sociology international relations development studies and migration and diaspora studies as well as policy makers and practitioners engaged in humanitarian action development cooperation and migration issues

The New Humanitarians in International Practice

2015-12-14

should the european neighbourhood policy stop at the borders of the european union s immediate neighbouring countries this book is the first full length study of the neighbours of the eu s neighbours a concept originally introduced by the european commission with reference to saharan africa the middle east and central asia these regions in the eu s broader neighbourhood are often perceived as an arc of crisis from which manifold challenges emanate for europe this timely book takes stock of the state of the eu s cooperation with the neighbours of its neighbours and explores how the concept might help promote security stability and prosperity beyond the countries which are formally part of the european neighbourhood policy how can the eu create bridges between these regions what instruments does the eu have at its disposal and how can it link them in order to respond to the challenges and overcome the current fragmentation one of the conclusions is the suggestion to consider a pragmatic eu strategy for the neighbours of its neighbours which addresses the needs of the broader eu neighbourhood in a more systematic and consistent manner and helps transform in the long run the arc of crisis into another ring of friends

The Neighbours of the European Union's Neighbours

2016-02-24

the concept of compliance of world trade organization wto law as part of international economic law is examined in this discerning book the issue of compliance is examined through a broad perspective considering the key conceptual issues which continu

The Political Economy of WTO Implementation and China's Approach to Litigation in the WTO

this green growth country assessment for FYR Macedonia defines and assesses the economic costs and benefits of a shift to greener growth for FYR Macedonia with a focus on climate action multi sector analytic work tied together by macroeconomic modeling generated a detailed green growth path to 2050 while addressing today s economic challenges policymakers need to keep the long term in mind both the likely impact of a changing climate on water agriculture and infrastructure and growing obligations to mitigate greenhouse gas emissions this consideration is particularly important for decisions on long lived infrastructure such as power supply irrigation or urban streets water distribution and sewers innovative modeling of water as a constraint on growth as the climate becomes warmer and drier quantified the tough tradeoffs that will be needed to balance competing demands from agriculture the power sector and municipalities and industry a greener energy sector needs to aim at increased supply security reduced greenhouse gas emissions and increased supply efficiency more generation to avoid blackouts and expensive imports lignite and oil replaced by gas and renewables in the supply mix and aggressive energy efficiency measures in industry buildings and households providing better transport services while containing accelerating emissions growth will require better fuel efficiency more use of rail and public transport and an integrated approach to urban transport that maximizes local cobenefits urban areas especially the capital city of Skopje hold the potential to lead on greener growth in recent years urban sprawl driven by growth in the number of single family houses that use wood for heating and private cars for commuting has pushed up the energy intensity of urban life as well as the cost of delivering infrastructure services to a less dense community the country also needs to plan for the impact of a changing climate on the reliability and quality of infrastructure services planners need to decide whether to build infrastructure to be more resilient today or wait to see what happens and spend more on maintenance and rehabilitation or replacement later for FYR Macedonia the top priorities for infrastructure adaptation over the next decade include urban drainage systems health and education facilities and municipal buildings the main local cobenefit of mitigation will be reduction of air pollution which is

march 2014

among the highest in europe particulate matter pollution from industry the power sector and road paving can be abated through better equipment while the other large and unusual source of air pollution the widespread use of wood for heat by urban households can be reduced in the near term by more modern stoves and in the long term by better heating options an economy wide macroeconomic assessment estimates the impact on growth and employment of packages of green growth actions across sectors and provides advice on priorities for public investment climate investments pose costs upfront but provide benefits both now and later adaptation interventions which protect tomorrow s output from climate damage are found to be less costly to growth and employment in the short term than mitigation measures which reduce greenhouse gas emissions once sector results are integrated into a general equilibrium model under a green climate action scenario moderate adaptation measures in agriculture and water and incremental expenses in the climate proofing of physical infrastructure would amount to the equivalent of around 0.1 percent of annual gdp while moderate mitigation measures would require the mobilization of resources constituting about one percent of annual gdp more ambitious climate action under a super green scenario would require water sector investments that reach one percent of gdp by 2015 while mitigation investments require two percent of gdp by 2020 green climate action would together generate short term losses to national income of more than two percent if financing is mobilized domestically while super green action induces even bigger losses however both moderate and ambitious climate action promise a medium to long term boost in the level of gdp reaching 1.5 to 2 percent by 2050

Red Tape

2018-06-14

this book looks both backward and forward with regard to the european union s political strategies towards its neighbouring countries by bringing together the perspectives of critical geopolitics policy studies and border studies it presents a comprehensive review of the european neighbourhood policy and how it impacts the ongoing construction of the eu s external frontiers is the eu committed to promoting integration in a wider european space or is a fortress europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders the book aims to problematize this question by showing how the eu s external policies are based on a mixture of openness and closure inclusion and exclusion cooperation and securitisation the european neighbourhood policy is a controversial strategy where regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border a specific focus is devoted to the diversity of geo strategies the eu is pursuing in its neighbouring countries and regions macro

regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players

FYR Macedonia Green Growth Country Assessment

2015-06-11

why have so few countries managed to leave systematic corruption behind while in many others modernization is still a mere façade how do we escape the trap of corruption to reach a governance system based on ethical universalism in this unique book alina mungiu pippidi and michael johnston lead a team of eminent researchers on an illuminating path towards deconstructing the few virtuous circles in contemporary governance the book combines a solid theoretical framework with quantitative evidence and case studies from around the world while extracting lessons to be learned from the success cases covered transitions to good governance avoids being prescriptive and successfully contributes to the understanding of virtuous circles in contemporary good governance
