Handheld Computing for Mobile Commerce: Applications, Concepts and Technologies

2010-02-28

this book looks at theory design implementation analysis and application of handheld computing under four themes handheld computing for mobile commerce handheld computing research and technologies wireless networks and handheld mobile security and handheld images and videos provided by publisher

Intelligent Multimedia Communication: Techniques and Applications

2011-07-06

multimedia data are used more and more widely in human being s life e g videoconferencing visual telephone iptv etc nearly most of the applications need multimedia transmission techniques that send multimedia data from one side to another side and keep the properties of efficiency robustness and security here the efficiency denotes the time cost of transmission operations the robustness denotes the ability to survive transmission errors or noises and the security denotes the protection of the transmitted media content recently various intelligent or innovative techniques are invented which bring vast performance improvements to practical applications for example such content transmission techniques as p2p sensor network and ad hoc network are constructed which adaptively use the peers properties to improve the network s resources multimedia adaptation techniques can adjust the multimedia data rate in order to compliant with the network s bandwidth scalable encryption techniques can generate the data stream that can be correctly decrypted after bit rate conversion ubiquitous multimedia services make the user share any kind of content anywhere the book includes fourteen chapters highlighting current concepts issues and emerging technologies distinguished scholars from many prominent research institutions around the world contribute to the book the book covers various aspects including not only some fundamental knowledge and the latest key techniques but also typical applications and open issues for example the covered topics include the present and future video coding standards stereo and multiview coding techniques free viewpoint tv techniques wireless broadcasting techniques media streaming techniques wireless media transmission techniques and systems and user generated content sharing

The Uyghur Lobby

2013-12-17

an upsurge in violence between uyghur and han in china s far western region of xinjiang has gained increased media and academic attention in recent years as was evidenced in the july 2009 riots numbering over eight million the uyghur are china s fifth largest minority nationality and their mounting aspiration for obtaining more autonomy has contributed to the recent ethnic conflicts in the region this book looks at those who are seeking to preserve the uyghur

identity and support the secession of xinjiang from china in order to create their own independent state by exploring the global operations and sister groups of the uyghur diaspora umbrella organization the world uyghur congress wuc it examines the networks of the wuc the coalitions it has formed the strategies the organization pursues to raise public awareness about uyghur issues around the globe and looks at the actors that have emerged as key players in the contemporary wuc network further this book shows that the uyghur lobby is not a unified movement but that the local groups that it consists of are highly constrained by the broader domestic politics of their host countries a fact which has a significant impact on the lobby s ability to realize its strategic and political ambitions in turn yu wen chen gauges the impact of the wuc on public opinion and policymakers in the world s democracies and shows how since uyghur organizations have been given legitimacy by liberal democracies and international governmental organizations they can no longer be considered merely splintered members of a far flung diaspora locked in a one sided struggle with beijing indeed uyghur activists can and do use their hard won legitimacy as legal migrants and asylum seekers to influence politics in their host countries this unique and timely study reveals how an issue concerning a chinese minority has been catapulted onto the wider global political stage and as such it will be of great interest to students and scholars working on chinese politics the uyghur issue and minority and ethnic politics social movements human rights and international politics more broadly

Transnational Cooperation of Ethnopolitical Mobilization

2009

this book explores the influences for ethnopolitical groups to act internationally in advancement of their group interests yu wen chen proposes an ecological approach to comprehend ethnopolitical contention in essence she argues that transnationalizing the contention has the merit of raising the ethnopolitical group s salience and helps to create niches that can demarcate one group from other claim making groups in a society quantitative analysis of the primary data from the european survey of ethnopolitical groups esepg and qualitative case studies confirm that although some ethnopolitical groups have presented their issues in the international arena the domestic realm is still the main locus for ethnopolitical contention to occur salience resources domestic and international opportunity structures affect ethnopolitical groups international engagement this book is an essential volume for anyone interested in ethnic mobilization social movements and transnationalization

Drug Discovery and Development

2011-12-16

drug discovery and development process aims to make available medications that are safe and effective in improving the length and quality of life and relieving pain and suffering however the process is very complex time consuming resource intensive requiring multi disciplinary expertise and innovative approaches there is a growing urgency to identify and develop more effective efficient and expedient ways to bring safe and effective products to the market the drug discovery and development process relies on the utilization of relevant and robust tools methods models and validated biomarkers that are predictive of clinical effects in

terms of diagnosis prevention therapy and prognosis there is a growing emphasis on translational research a bidirectional bench to the bedside approach in an effort to improve the process efficiency and the need for further innovations the authors in the book discuss the current and evolving state of drug discovery and development

Rethinking Social Capital and Entrepreneurship in Greater China

2016-05-05

family networks and wider personal social relationships guanxi have long been held to be a significant factor making for the success of many chinese family businesses and guanxi is often seen as a special characteristic which shapes the nature of all business in china this book re examines this proposition critically bringing together the very latest research and comparing the situation in different parts of greater china mainland china taiwan and hong kong it considers entrepreneurship venture capital intergenerational succession disputes family businesses in different sectors of the economy and particular family businesses among the book s many interesting conclusions is the observation that guanxi capitalism has evolved in different ways in the different parts of greater china with the particular institutional setting having a major impact

Constructing China's Capitalism

2012-08-06

by investigating the nexus of relationships between urban and rural factories in the shanghai region of china this book shines light on an overlooked part of china s massive industrial growth since the 1980s

Myths about Women's Rights

2015

as one of the first studies of its kind this book synthesises competing explanations of women s rights and rigorously tests the implications of cultural international norms building and core rights explanations across nationality political reproductive and property rights the results show that conventional wisdoms are often overstated and incomplete such that far less is actually known about how where and why women s rights improve

Decision Support System and Automated Negotiations

2023-07-05

decision support systems are developed for integrated pest and disease management and nutrition management using open source technologies as java android and low cost hardware devices like arduino micro controller this text discusses the techniques to convert agricultural knowledge in the context of ontology and assist grape growers by providing this knowledge

through decision support system the key features of the book are presents the design development of an ontology based decision support system for integrated crop management discusses the techniques to convert agricultural knowledge in text to ontology focuses on an extensive study of various e negotiation protocols for automated negotiations provides an architecture for predicting the opponent s behaviour and various factors which affect the process of negotiation the text is primarily written for graduate students professionals and academic researchers working in the fields of computer science and engineering agricultural science and information technology

China's Uneven and Combined Development

2020-10-15

this book mobilises the theory of uneven and combined development to uncover the geopolitical economic drivers of china s rise the purpose is to explain the formation and trajectory of its economic accumulation system which remains a confounding hybrid of statist and neoliberal forms of capitalism as the outcome of china s geopolitical engagement of the usa during the late stages of the cold war and its participation in manufacturing global production networks gpn's fear of geopolitical catastrophe drove china to open its economy while gpn's enabled china to generate substantial export surpluses which could be recycled through state owned banks as cheap credit and subsidies to large vertically integrated and politically controlled state owned enterprises in this way a synergy emerged between the neoliberal and keynesian fordist sectors of the economy while the national territorial state retained its form and expanded its functions the book chronicles how this reliance on export surpluses however rendered china extremely vulnerable to external shocks prompting a dramatic monetary and fiscal stimulus response to the crisis of 2008 even while sustaining the illusion of economic decoupling from the global economy finally it examines the growing role of the state in the current crisis ridden economic model as well as china s current geoeconomic and geopolitical expansionism in areas such as the belt and road initiative and the militarisation of the east and south china seas

Discrete Choice Modelling and Air Travel Demand

2016-05-23

in recent years airline practitioners and academics have started to explore new ways to model airline passenger demand using discrete choice methods this book provides an introduction to discrete choice models and uses extensive examples to illustrate how these models have been used in the airline industry these examples span network planning revenue management and pricing applications numerous examples of fundamental logit modeling concepts are covered in the text including probability calculations value of time calculations elasticity calculations nested and non nested likelihood ratio tests etc the core chapters of the book are written at a level appropriate for airline practitioners and graduate students with operations research or travel demand modeling backgrounds given the majority of discrete choice modeling advancements in transportation evolved from urban travel demand studies the introduction first orients readers from different backgrounds by highlighting major distinctions between aviation and urban travel demand studies this is followed by an in depth treatment of two of

the most common discrete choice models namely the multinomial and nested logit models more advanced discrete choice models are covered including mixed logit models and generalized extreme value models that belong to the generalized nested logit class and or the network generalized extreme value class an emphasis is placed on highlighting open research questions associated with these models that will be of particular interest to operations research students practical modeling issues related to data and estimation software are also addressed and an extensive modeling exercise focused on the interpretation and application of statistical tests used to guide the selection of a preferred model specification is included the modeling exercise uses itinerary choice data from a major airline the text concludes with a discussion of on going customer modeling research in aviation discrete choice modelling and air travel demand is enriched by a comprehensive set of technical appendices that will be of particular interest to advanced students of discrete choice modeling theory the appendices also include detailed proofs of the multinomial and nested logit models and derivations of measures used to represent competition among alternatives namely correlation direct elasticities and cross elasticities

Berkshire Dictionary of Chinese Biography Volume 4

2015-05-01

the berkshire dictionary of chinese biography 1979 2015 provides a riveting new way to understand twenty first century china and a personal look at the changes that have taken place since the reform and opening up era started in 1979 one hundred key individuals from this period were selected by an international group of experts and the stories were written by more than 70 authors in 14 countries the authors map the paths taken by these individuals some rocky some meandering some fateful and in telling their stories give contemporary chinese history a human face the editors have included with the advice of myriad experts around the world not only the life stories of politicians and government officials who play a crucial role in the development of the country but the stories of cultural figures including film directors activists writers and entrepreneurs from the mainland china hong kong and also from taiwan the greater china that comes through in this volume has diverse ideas and identities it is often contradictory sometimes fractious and always full of creative human complexity some of the lives rendered here are heroic some are tragic and many are inspirational some figures come in for trenchant criticism and others are celebrated with a sense of wonder and awe like previous volumes of the berkshire dictionary of chinese biography this volume includes a range of appendices including a pronunciation guide a bibliography and a timeline of key events

Control Engineering and Information Systems

2015-01-19

control engineering and information systems contains the papers presented at the 2014 international conference on control engineering and information systems icceis 2014 yueyang hunan china 20 22 june 2014 all major aspects of the theory and applications of control engineering and information systems are addressed including intelligent s

A Transnational Human Rights Approach to Human Trafficking

2017-11-13

in a transnational human rights approach to human trafficking yoon jin shin proposes an innovative and comprehensive human rights framework to human trafficking to empower victimized individuals as rights holders overcoming the current regime s state interest driven border and crime control approach

Big Data Management, Technologies, and Applications

2013-10-31

this book discusses the exponential growth of information size and the innovative methods for data capture storage sharing and analysis for big data provided by publisher

Constitutionalism in Asia in the Early Twenty-First Century

2014-04-17

a systematic and up to date account of constitutional developments in sixteen asian countries including analysis from a comparative perspective

Nationalisms in the European Arena

2017-11-21

this book explores how the multiplicity of nationalist parties across the european union have embraced or refused the process of european integration and made it a platform for transnational coordination in the european arena the author analyzes how opposing pro european minority nationalist parties and eurosceptic populist nationalist parties have diversely politicized european integration over the past three decades and engage in different patterns of europeanization tracing their divergent trajectories of transnational coordination the book examines the common challenges these opposing nationalist party families face and their systematic fragmentation in the european arena the book offers a novel approach to understanding the conditions for the emergence of truly european nationalist party families based on the interaction of ideological strategic and institutional variables that underpin the europeanization of heterogeneous nationalisms nationalisms in the european arena will be of interest to students and scholars across a range of disciplines including sociology and political science it contributes to the increasing literature on identity politics in the european union and reveals the mechanisms behind why the european arena is adverse to the political translation and organization of domestic nationalisms as distinctive european actors

2012-05-17

a comprehensive reference resource on comparative constitutional law this title examines the history and development of the discipline its core concepts institutions rights and emerging trends

Advances in Intelligent Information and Database

Systems

2010-03-16

intelligent information and database systems are two closely related and we established subfields of modern computer science they focus on the integration of artificial intelligence and classic database technologies in order to create the class of next generation information systems the major target of this new generation of systems is to provide end users with intelligent behavior simple and or advanced learning problem solving uncertain and certain reasoning se organization cooperation etc such intelligent abilities are implemented in classic information systems to make them autonomous and user oriented in particular when advanced problems of multimedia information and knowledge discovery access retrieval and manipulation are to be solved in the context of large distributed and heterogeneous environments it means that intelligent knowledge based information and database systems are used to solve basic problems of large collections management carry out knowledge discovery from large data collections reason about information under uncertain conditions support users in their formulation of complex queries etc topics discussed in this volume include but are not limited to the foundations and principles of data information and knowledge models methodologies for intelligent information and database systems analysis design implementation validation maintenance and evolution

The Republic of China Yearbook 2009

2008

rarely do acts of civil disobedience come in such grand fashion as taiwan s sunflower movement and hong kong s umbrella movement the two protests came in regions and jurisdictions that many have underestimated as regards furthering notions of political speech democratisation and testing the limits of authority this book breaks down these two movements and explores their complex legal and political significance the collection brings together some of asia s and especially taiwan and hong kong s most prolific writers many of whom are internationally recognised experts in their respective fields to address the legal and political significance of both movements including the complex questions they posed as regards democracy rule of law authority and freedom of speech given that occupational type protests have become a prominent method for protesters to make their cases to both citizens and governments exploring the legalities of these significant protests and establishing best practices will be important to future movements wherever they may transpire with this in mind the book does not stop at implications for taiwan and hong kong but talks about its subject matter from a comparative international perspective

Law and Politics of the Taiwan Sunflower and Hong Kong Umbrella Movements

2017-03-27

herbal supplements an evenhanded study of pharmacological interactions between western drugs and herbal supplements today a significant percentage of americans turn to

complementary and alternative medicine practices despite their popularity and wide use these products do not undergo the same pre market testing for safety and efficacy that is required of pharmaceuticals in herbal supplements efficacy toxicity interactions with western drugs and effects on clinical laboratory tests editors amitava dasgupta and catherine hammett stabler present a comprehensive introduction to both safe and unsafe herbal supplements the book emphasizes the pharmacological interactions identified between western drugs and herbal supplements and the effects of herbal supplements on clinical laboratory tests herbal supplements provides a guide to the interpretation of abnormal test results in otherwise healthy subjects due to use of herbal remedies focusing on interactions between herbals and pharmaceuticals sources of contamination in herbal supplements and analytical techniques used in the investigation of herbal remedies the book details pharmacological interactions between western drugs and herbal supplements effects of herbal supplements on clinical laboratory tests key interactions between herbal supplements and various pharmaceutical drugs medicinal plants and toxic effects contamination of herbal supplements from metals pharmaceuticals and plant poisoning analytical techniques including immunoassays used in the investigation of herbal remedies unbiased and literature based this text offers toxicologists clinical chemists analysts and pharmacologists a no nonsense take on the efficacy toxicity and drug interactions of herbal supplements and medicines

Herbal Supplements

2011-03-21

this book offers a vital research within the field of personal computing highlighting the latest trends in research and development of personal technology provided by publisher

Emergent Trends in Personal, Mobile, and Handheld Computing Technologies

2012-04-30

many aspects of nature biology or even from society have become part of the techniques and algorithms used in computer science or they have been used to enhance or hybridize several techniques through the inclusion of advanced evolution cooperation or biologically based additions the previous nicso workshops were held in granada spain 2006 acireale italy 2007 and in tenerife spain 2008 as in the previous editions nicso 2010 held in granada spain was conceived as a forum for the latest ideas and the state of the art research related to nature inspired cooperative strategies the contributions collected in this book cover topics including nature inspired techniques like genetic algorithms evolutionary algorithms ant and bee colonies swarm intelligence approaches neural networks several cooperation models structures and strategies agents models social interactions as well as new algorithms based on the behaviour of fireflies or bats

Nature Inspired Cooperative Strategies for Optimization

(NICSO 2010)

Sustainable ICTs and Management Systems for Green Computing

2012-06-30

the advances in the generation and processing of multimedia data e.g documents images video audio animations etc have had an immense impact on multimedia applications and as a result multimedia has permeated almost every aspect of our daily lives this development has also brought with it a whole host of issues and challenges which were either not as apparent before or were non-existent today digital media is relied upon as primary news and information resource as evidence in a court of law as part of medical records or as financial documents however there is still lack of authoritative mechanisms to verify the origin and veracity of media data indeed multimedia content has become an extremely valuable asset and it is being both disseminated and consumed on a larger scale than ever before but the issues concerning how the content owners and publishers should control the distribution of and access to their content have not been satisfactorily resolved yet there are various other issues related to use of multimedia that require further analysis and research for example it is a known fact that some criminal organizations communicate with its members by posting information embedded media to public forums and web sites to evade surveillance by law enforcement conventional multimedia processing approaches do not provide sufficiently effective means for fending against such communication

Intelligent Multimedia Analysis for Security Applications

2010-04-03

this comprehensive reference on the fundamentals of hemodialysis access creation and advanced management for maintenance is designed to meet the needs of all surgeons and physicians responsible for the treatment and care of patients undergoing dialysis the book opens by discussing every aspect of dialysis access planning including selection of the right access for the individual patient and access strategies hemodialysis access techniques from the most basic to the most complex and unconventional are then described step by step and guidance is provided on follow up detailed attention is also devoted to the challenging management of specific complications of dialysis access surgery including failing hemodialysis access the book includes a wealth of informative high quality images and illustrations and the authors are prominent vascular surgeons transplant surgeons general surgeons nephrologists and interventional radiologists from across the united states

Hemodialysis Access

2016-11-21

the increasing complexity of our world demands new perspectives on the role of technology in decision making human decision making has its limitations in terms of information processing capacity we need new technology to cope with the increasingly complex and information rich nature of our modern society this is particularly true for critical environments such as crisis management and traffic management where humans need to engage in close collaborations with artificial systems to observe and understand the situation and respond in a sensible way we believe that close collaborations between humans and artificial systems will become essential and that the importance of research into interactive collaborative information systems is self evident developments in information and communication technology have radically changed our working environments the vast amount of information available nowadays and the wirelessly networked nature of our modern society open up new opportunities to handle difficult decision making situations such as computer supported situation assessment and distributed decision making to make good use of these new possibilities we need to update our traditional views on the role and capabilities of information systems the aim of the interactive collaborative information systems project is to develop techniques that support humans in complex information environments and that facilitate distributed decision making capabilities this emphasizes the importance of building actor agent communities close collaborations between human and artificial actors that highlight their complementary capabilities and in which task distribution is flexible and adaptive

Interactive Collaborative Information Systems

2010-03-22

computer vision is the science and technology of making machines that see it is concerned with the theory design and implementation of algorithms that can automatically process visual data to recognize objects track and recover their shape and spatial layout the international computer vision summer school icvss was established in 2007 to provide both an objective and clear overview and an in depth analysis of the state of the art research in computer vision the courses are delivered by world renowned experts in the field from both academia and industry and cover both theoretical and practical aspects of real computer vision problems the school is organized every year by university of cambridge computer vision and robotics group and university of catania image processing lab different topics are covered each year a summary of the past computer vision summer schools can be found at dmi.unict.it/icvss this edited volume contains a selection of articles covering some of the talks and tutorials held during the first two editions of the school on topics such as recognition registration and reconstruction the chapters provide an in depth overview of these challenging areas with key references to the existing literature

Computer Vision

the historical dictionary of taiwan cinema covers the history of taiwan cinema during both the japanese colonial period 1895 1945 and chinese nationalist period 1945 present this is accomplished through a chronology list of acronyms and abbreviations an introductory essay an extensive bibliography and more than a hundred cross referenced entries on directors producers performers films film studios and genres the book is an excellent access point for students researchers and anyone wanting to know more about taiwan cinema as well as the social political financial and creative intricacies of how at least one important national cinema developed

Historical Dictionary of Taiwan Cinema

2012-11-08

knighting in sequence biology edward n trifonov genome classification construction of phylogenetic trees became today a major approach in studying evolutionary relatedness of various species in their vast versity although the modern genome clustering delivers the trees which are very similar to those generated by classical means and basic terminology is the same the phenotypic traits and habitats are not anymore the playground for the classification the sequence space is the playground now the phenotypic traits are placed by sequence characteristics words in particular matter of factually the phenotype and genotype merged to confusion of both classical and modern phylogeneticists accordingly a completely new vocabulary of stringology information theory and applied mathematics took over and a new brand of scientists emerged those who do know the math and simultaneously do know biology the book is written by the authors of this new brand there is no way to test their literacy in biology as no biologist by training would even try to enter into the elite circle of those who masters their almost occult language but the army of formalicians formal linguists mathematicians humbly or aggressively longing to join modern biology got an excellent introduction to the field of genome clustering written by the team of their kin

Genome Clustering

2010-06-07

we live in a wireless society one where convenience and accessibility determine the efficacy of the latest electronic gadgets and mobile devices making the most of these technologies and ensuring their security against potential attackers requires increased diligence in mobile technology research and development mobile computing and wireless networks concepts methodologies tools and applications brings together a comprehensive range of voices and research in the area of mobile and wireless technologies exploring the successes and failures advantages and drawbacks and benefits and limitations of the technology with applications in a plethora of different research and topic areas this multi volume reference work benefits researchers service providers end users and information technology professionals this four volume reference work includes a diverse array of chapters and authors covering topics such as m commerce network ethics mobile agent systems mobile learning communications infrastructure and applications in fields such as business healthcare government tourism and more

mining social networks has now becoming a very popular research area not only for data mining and web mining but also social network analysis data mining is a technique that has the ability to process and analyze large amount of data and by this to discover valuable information from the data in recent year due to the growth of social communications and social networking websites data mining becomes a very important and powerful technique to process and analyze such large amount of data thus this book will focus upon mining and analyzing social network some chapters in this book are extended from the papers that presented in msnds2009 the first international workshop on mining social networks for decision support and snmaba2009 the international workshop on social networks mining and analysis for business applications in addition we also sent invitations to researchers that are famous in this research area to contribute for this book the chapters of this book are introduced as follows in chapter 1 graph model for pattern recognition in text qin wu et al present a novel approach that uses a weighted directed multigraph for text pattern recognition in the proposed methodology a weighted directed multigraph model has been set up by using the distances between the keywords as the weights of arcs as well a keyword frequency distance based algorithm has also been introduced case studies are also included in this chapter to show the performance is better than traditional means
