Concept Development and the Development of Word Meaning

2012-12-06

this volume owes its existence to many different sources and influences it is based on a meeting that took place from april 30 to may 2 1982 at the university of technology in darmstadt the idea for that meeting came while we were elaborating a research program on concept development and the development of word meaning we were inspired by werner deutsch of the max planck institute for psycholinguistics in nijmegen the netherlands and by the volkswagen foundation in hannover federal republic of germany to organize an international conference on the same topic we set out to invite a long list of colleagues and we only regret that not all of them were able to attend this volume should not be viewed as the proceedings of that conference on the one hand it does not include all of the papers presented there and on the other hand some of our colleagues who were unable to attend were nevertheless willing to write contributions furthermore some who did present papers at the conference revised and reformulated them or even submitted completely new ones for this book we feel however that in the end we have arranged a valuable collection of work in the theory and research of a field that has occupied not only psychologists and linguists but also philosophers anthropologists and many others for a long time

Explicit Direct Instruction (EDI)

2009

a proven method for better teaching better learning and better test scores this teacher friendly book presents a step by step approach for implementing the explicit direct instruction edi approach in diverse classrooms based on educational theory brain research and data analysis edi helps teachers deliver effective lessons that can significantly improve achievement all grade levels the authors discuss characteristics of edi such as checking for understanding lesson objectives activating prior knowledge concept and skills development and guided practice and provide clearly defined lesson design components detailed sample lessons easy to follow lesson delivery strategies scenarios that illustrate what edi techniques look like in the classroom

Early Category and Concept Development

2008-12-30

whether or not infants earliest perception of the world is a blooming buzzing confusion it is not long before they come to perceive structure and order among the objects and events around them at the core of this process and cognitive development in general is the ability to categorize to group events objects or properties together and to form mental representations or concepts that encapsulate the commonalities and structure of these categories categorization is the primary means of coding experience underlying not only perceptual and reasoning processes but also inductive inference and language the aim of this book is to bring together the most recent findings and theories

about the origins and early development of categorization and conceptual abilities despite recent advances in our understanding of this area a number of hotly debated issues remain at the center of the controversy over categorization researchers continue to ask questions such as which mechanisms for categorization are available at birth and which emerge later what are the relative roles of perceptual similarity and nonobservable properties in early classification what is the role of contextual variation in categorization by infants and children do different experimental procedures reveal the same kind of knowledge can computational models simulate infant and child categorization how do computational models inform behavioral research what is the impact of language on category development how does language partition the world this book is the first to address these and other key questions within a single volume the authors present a diverse set of views representing cutting edge empirical and theoretical advances in the field the result is a thorough review of empirical contributions to the literature and a wealth of fresh theoretical perspectives on early categorization

Conceptual Development

1999-04-01

this book examines a key issue in current cognitive theories the nature of representation each chapter is characterized by attempts to frame hot topics in cognitive development within the landscape of current developmental theorizing and the past legacy of genetic epistemology the chapters address four questions that are fundamental to any developmental line of inquiry how should we represent the workings and contents of the mind how does the child construct mental models during the course of development what are the origins of these models and what accounts for the novelties that are the products and producers of developmental change these questions are situated in a historical context piagetian theory and contemporary researchers attempt to trace how they draw upon depart from and transform the piagetian legacy to revisit classic issues such as the child's awareness of the workings of mental life the child's ability to represent the world and the child's growing ability to process and learn from experience the theoretical perspectives covered include constructivism connectionism theory theory information processing dynamical systems and social constructivist approaches the research areas span imitation mathematical reasoning biological knowledge language development and theory of mind written by major contributors to the field this work will be of interest to students and researchers wanting a brief but in depth overview of the contemporary field of cognitive development
