2016-05 this collection brings together a group of highly respected law and religion scholars to explore the funding of religious heritage in the context of state support for religions the importance of this state support is that on the one hand it illustrates the potential tensions between secular and religious values whilst on the other it constitutes a relevant tool for investigating the question of the legitimacy of such financial support the funding logically varies according to the national system of state religion relationships and this is reflected in the range of countries studied including belgium bulgaria denmark france italy the netherlands spain turkey and the united kingdom the book provides clarity in the assignment of funds to religious heritage as well as seeking to define the limit of what relates to the exercise of worship and what belongs to cultural policy it is clear that the main challenge for the future lies not only in managing the dual purpose of religious monuments but also in re using these buildings which have lost their original purpose this collection will appeal to those interested in cultural heritage management as well as law and religion scholars the views expressed during the execution of the religare project in whatever form and or by whatever medium are the sole responsibility of the authors the european union is not liable for any use that may be made of the information contained therein

DMRC Exam for Jr. Engineer (Electrical) Guide + Workbook (10 Practice Sets) Paper I & II 2nd edition 2015-09-01 with the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid at the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up this book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation based on empirical evidence from south africa and tanzania the authors show that aid related advisory processes are inevitably

obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning as a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments for young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens
