Shi'ism 1988-01-01 first published in 1967 writing and difference a collection of jacques derrida s essays written between 1959 and 1966 has become a landmark of contemporary french thought in it we find derrida at work on his systematic deconstruction of western metaphysics the book s first half which includes the celebrated essay on descartes and foucault shows the development of derrida s method of deconstruction in these essays derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought one of his main targets being the way in which structuralism unwittingly repeats metaphysical concepts in its use of linguistic models the second half of the book contains some of derrida s most compelling analyses of why and how metaphysical thinking must exclude writing from its conception of language finally showing metaphysics to be constituted by this exclusion these essays on artaud freud bataille hegel and lévi strauss have served as introductions to derrida s notions of writing and différence the untranslatable formulation of a nonmetaphysical concept that does not exclude writing for almost a generation of students of literature philosophy and psychoanalysis writing and difference reveals the unacknowledged program that makes thought itself possible in analyzing the contradictions inherent in this program derrida foes on to develop new ways of thinking reading and writing new ways based on the most complete and rigorous understanding of the old ways scholars and students from all disciplines will find writing and difference an excellent introduction to perhaps the most challenging of contemporary french thinkers challenging because derrida questions thought as we know it

Issues in Phonological Theory 1973-01-01 as john casti wrote finally a book that really does explain consciousness this

groundbreaking work by denmark s leading science writer draws on psychology evolutionary biology information theory and other disciplines to argue its revolutionary point that consciousness represents only an infinitesimal fraction of our ability to process information although we are unaware of it our brains sift through and discard billions of pieces of data in order to allow us to understand the world around us in fact most of what we call thought is actually the unconscious discarding of information what our consciousness rejects constitutes the most valuable part of ourselves the me that the i draws on for most of our actions fluent speech riding a bicycle anything involving expertise no wonder that in this age of information so many of us feel empty and dissatisfied as engaging as it is insightful this important book encourages us to rely more on what our instincts and our senses tell us so that we can better appreciate the richness of human life
