The Growth of Economic Thought 1991

in a new and updated edition of this classic textbook henry william spiegel brings his discussion and analysis of economic thought into the 1990s a new introductory chapter offering an overall view of the history of economics and a bibliographic survey of the economic literature of the 1980s and early 1990s have been added maintaining the link between economics and the humanities spiegel s text will continue to introduce students to a wide range of topics in the history of economic thought from reviews of previous editions the history of economic thought to end all histories of economic thought robert d patton journal of economic literature the book is in the grand tradition of the history of doctrines it is a history of economic thought broadly conceived and superbly written to boot it is not to much to say that spiegel s book will become and remain a leading text in the field warren j samuels social science the author conveys the essence of an idea simply and clearly yet in a graceful style william f kennedy journal of economic literature

Introduction to Economic Growth 2013

the long awaited revision of the text that brought growth theory to the classroom

Stages of Economic Growth 2020

recent years have seen an increasing body of literature on the economic histories of individual third world countries this book by eminent scholar lloyd g reynolds is the first to draw together this material and fit it into a systematic framework focusing on the forty one largest countries in asia africa and latin america reynolds shows that the third world has a rich historical record of growth and that its growth patterns bear some resemblance to those observed earlier in europe and north america reynolds begins with a definition of economic growth dividing it into three phases the era of extensive growth during which population and national output increase at about the same rate the turning point a decade or two that marks the beginning of a sustained rise in per capita output and the era of intensive growth marked by a continuing rise in per capita output in chapters that deal with individual countries reynolds dates the turning point explores the attendant economic and political circumstances and outlines the key features of intensive growth from that point to the early 1980s in the rest of the book reynolds analyzes such issues as why some countries reached the turning point much earlier than others what role was played by political leadership by opportunities for foreign trade and by colonial rule or its absence why certain countries grew faster than others and what government can do to promote economic growth

Economic Growth in the Third World 1986

this history of theories and theorists of economic growth elucidates the economic theory economic history and public policy observations of the renowned scholar w w rostow looking at the economic growth theories of the classic economists up to 1870 rostow compares hume and adam smith malthus and ricardo and j s mill and karl marx he then examines the period 1870 1939 and its economic theorists including schumpeter colin clark kuznets and harrod and surveys the three forms of growth analysis in the postwar era formal models statistical morphology and development theories this authoritative overview also includes an agenda of unresolved problems in growth analysis and a description of the five major tasks statesmen will confront over the next several generations

Theorists of Economic Growth from David Hume to the Present 1992-09-24

this textbook covers the full range of topics and issues normally included in a course on economic growth and development both mainstream economic perspectives as well as the multi paradigmatic inter disciplinary and dynamic evolutionary perspectives from heterodox economics are detailed economic development is viewed in terms of the long run well being of humanity social stability environmental sustainability and just distribution of economic gains not simply as the growth of gdp furthermore this textbook explicitly recognizes the complexity of economic development by linking economic activity to our broader social and natural environments the textbook s unique feature is its focus on the natural environment both the historical effects of economic development on the environment and the environmental constraints on future economic development are thoroughly discussed in two chapters on environmental issues and policies in fact because economic development is defined in terms of economic social and environmental sustainability the natural environment is included in discussions throughout the book the textbook is inter disciplinary knowledge from fields such as sociology psychology political science economic history and ecology is called on to enhance the economic analysis a thorough historical account of the development of the principal paradigms of economic development is also included and the important issues of institutional development and cultural change merit their own chapters two chapters on technological change holistically focus on production technologies as well as the dynamic performance of entire economic social and ecological systems also the important relationship between economic development and globalization is presented in three chapters on international trade international finance and investment and immigration from both orthodox and heterodox perspectives request inspection copy

Economic Growth and Development 2016-09-02

examining empirical evidence such as how rich are the rich countries how poor are the poor and how fast do rich and poor countries grow noted economist charles jones presents major theories of economic growth from the nobel prize winning work of robert solow to new growth theory that has ignited the field in recent years

Introduction to Economic Growth 1998

what can prosperity possibly mean in a world of environmental and social limits the publication of prosperity without growth was a landmark in the sustainability debate tim jackson s piercing challenge to conventional economics openly questioned the most highly prized goal of politicians and economists alike the continued pursuit of exponential economic growth its findings provoked controversy inspired debate and led to a new wave of research building on its arguments and conclusions this substantially revised and re written edition updates those arguments and considerably expands upon them jackson demonstrates that building a post growth economy is a precise definable and meaningful task starting from clear first principles he sets out the dimensions of that task the nature of enterprise the quality of our working lives the structure of investment and the role of the money supply he shows how the economy of tomorrow may be transformed in ways that protect employment facilitate social investment reduce inequality and deliver both ecological and financial stability seven years after it was first published prosperity without growth is no longer a radical narrative whispered by a marginal fringe but an essential vision of social progress in a post crisis world fulfilling that vision is simply the most urgent task of our times

Prosperity without Growth 2016-12-08

this book is open access under a cc by 4 0 license this text offers a comprehensive and nuanced view of the economic development of spain since 1850 it provides a new set of historical gdp estimates for spain from the demand and supply sides and presents a reconstruction of production and expenditure series for the century prior to the introduction of modern national accounts the author splices available national accounts sets over the period 1958 2015 through interpolation as an alternative to conventional retropolation the resulting national accounts series are linked to the historical estimates providing yearly series for gdp and its components since 1850 on the basis of new population estimates the author derives gdp per head decomposed into labour productivity and the amount of work per person and placed into international perspective with theoretical reasoning and historiographical implications prados de la escosura provides a useful methodological reference work for anyone interested in national accounting open access has been made possible thanks to fundación rafael del pino s generous

support you can find the full dataset here espacioinvestiga.org/bbdd/chne/lang/en this book stands among the classics for the kuznetian paradigm in empirical economics this is the definitive study of spain s transition to a modern economy patrick karl o brien emeritus fellow at st antony s college the university of oxford uk and professor emeritus of global economic history at the london school of economics and political science uk the definitive account of spanish economic growth since 1850 based firmly on a magisterial reconstruction of that country s national accounts and an unrivalled knowledge of both spanish and global economic history of the period stephen broadberry professor of economic history at nuffield college the university of oxford uk

Three Papers in Economic Growth and Inequality 2017

the long awaited second edition of an important textbook on economic growth a major revision incorporating the most recent work on the subject this graduate level text on economic growth surveys neoclassical and more recent growth theories stressing their empirical implications and the relation of theory to data and evidence the authors have undertaken a major revision for the long awaited second edition of this widely used text the first modern textbook devoted to growth theory the book has been expanded in many areas and incorporates the latest research after an introductory discussion of economic growth the book examines neoclassical growth theories from solow swan in the 1950s and cass koopmans in the 1960s to more recent refinements this is followed by a discussion of extensions to the model with expanded treatment in this edition of heterogeneity of households the book then turns to endogenous growth theory discussing among other topics models of endogenous technological progress with an expanded discussion in this edition of the role of outside competition in the growth process technological diffusion and an endogenous determination of labor supply and population the authors then explain the essentials of growth accounting and apply this framework to endogenous growth models the final chapters cover empirical analysis of regions and empirical evidence on economic growth for a broad panel of countries from 1960 to 2000 the updated treatment of cross country growth regressions for this edition uses the new summers heston data set on world income distribution compiled through 2000

Spanish Economic Growth, 1850–2015 2017-09-04

the 3rd annual conference of the portuguese association of energy economics apeen and the international meeting on energy and environmental economics me3 took place on the 18 19 october 2018 in braga portugal the event was hosted by the universidade do minho and gathered the contributions of specialists in energy and environmental economics to enrich the debate about the many issues raised by the management of resources and waste the main topic was managing resources and waste challenges for energy and environmental economics beyond 2030 natural resources are the keystone in environmental and energy economics nowadays resource management cannot ignore waste traditionally seen as a by product of consumption and production decisions but

increasingly recognized as a source of energy or as new type of resource the apeen me3 joint conference had over 50 presentations from researchers from all over the world and lively discussions some of these presentations are summarized in the short papers compiled in this book of proceedings we are grateful to have had the presence and contribution of the keynote speakers maria l loureiro universidade de santiago de compostela and martin brocklehurst kempley green consultants their speeches challenged us now to think of new research and business opportunities beyond 2030 on behalf of the organizing committee i thank our sponsor lipor and all presenters for their academic excellence and lively participation lógia pinto universidade do minho

Economic Growth, second edition 2003-10-10

the world at large is watching both china and india as powerhouses of economic growth the two nations have achieved significantly high rates of economic growth ever since their respective economies liberalized in 1978 and 1991 singapore despite its limited land size and almost total dependence on external trade has performed remarkably well and has moved from the third world to the first this book documents and explains the rapid economic growth of the three key asian economies the book also looks at what has happened to income inequality in the context of superior growth performance it makes comparative assessments and examines the implications for the three nations since free markets have nothing in them to produce a reduction in income inequality among persons households one must at best hope for equality of opportunity notably reflected in identical schooling for all identical health care for all and minimal rather than vulgar inequality in housing this book is particularly useful for both china and india which may wish to study and learn from singapore in regard to the policies programmes and projects aimed at ensuring equality of opportunity the book is backed by considerable expertise on the part of the researchers with demonstrated expertise through their publications spanning a few decades it is invaluable to those who are concerned with designing policies for developing countries aimed at rapid and inclusive economic growth this book has been made possible by the intellectual and financial support extended by the global asia institute national university of singapore

3rd Annual Meeting of the Portuguese Association of Energy Economics & 5th Meeting of Environmental and Energy Economics 2019-12-20

to understand why some regions grow and others stagnate we need to understand the interactions between economic growth economic geography and the economics of innovation each of these individual approaches has strengths and weaknesses but when integrated it is possible as evidenced by this volume to develop an appropriate model of technology led regional economic development this authoritative collection presents a selection of key previously published articles which investigate these three perspectives

the volume explores the importance of human capital entrepreneurship clusters and competition and public policy to the growth of cities the editor has written a new introduction which highlights the contribution of each article and calls for a closer collaboration between economics and regional science in order to develop a new approach to the study of the growth of cities

Economic Growth and Income Inequality in China, India and Singapore 2013-03-01

macroeconomics understanding the global economy 3rd edition is to help students and indeed anyone understand contemporary and past economic events that shape the world we live in and at a sophisticated level but it does so without focusing on mathematical techniques and models for their own sake theory is taken seriously so much so that the authors go to pains to understand the key aspects of theories in a way that will not put people off before they see how theories are useful to analyse issues the authors believe that theories are essential to better understand the world thus the book includes a wealth of historic and current episodes and data to both see how theories can help interpret the world and also to judge their validity economies today are very inter connected what happens in china matters pretty much everywhere and what happens in one even small country in the euro zone has implications for the whole euro area and beyond consequently macroeconomics 3rd edition adopts a very international focus

The Growth of Cities 2006

energy drives the economy economics informs policy and policy affects social outcomes since the oil crises of the 1970s pundits have debated the validity of this sequence but most economists and politicians still ignore it thus they delude the public about the underlying influence of energy costs and constraints on economic policies that address such pressing contemporary issues as income inequality growth debt and climate change to understand why carey king explores the scientific and rhetorical basis of the competing narratives both within and between energy technology and economics energy and economic discourse seems to mirror newton s 3rd law of motion for every narrative there is an equal and opposite counter narrative the competing energy narratives pit drill baby drill against renewable technologies such as wind and solar both claim to provide secure reliable clean and affordable energy to support economic growth with the most benefit to society but how to answer this question we need to understand the competing economic narratives techno optimism and techno realism techno optimism claims that innovation overcomes any physical resource constraints and enables the social outcomes and economic growth we desire techno realism in contrast states that no matter what energy technologies we use feedbacks from physical growth on a finite planet constrain economic growth and create an uneven distribution of social impacts in the economic superorganism you will discover stories data science and philosophy to guide you through the arguments from competing narratives on energy growth and policy you will be able to distinguish the technically possible from the socially viable and understand how our future depends on this

distinction

Macroeconomics 2012-04-09

The Economic Superorganism 2020-10-07

this book brings together contributions in growth theory and macroeconomic dynamics that reflect more recent developments in the ongoing debate over the relative merits of neoclassical and endogenous growth models it focuses on three important areas that have been receiving increasing attention theoretical aspects numerical and statistical aspects and international issues

Three Empirical Essays on the Determinants of Economic Growth 2007

this book makes original contributions to the literature on clusters human capital and regional development by focusing on the link between entrepreneurship and economic growth aiming for a better understanding of the dynamics of growth determined by the entrepreneur s action in the regional space the focus is therefore on critical reflection and rethinking the articulation between three levels of analysis of economic systems namely entrepreneurship human capital and regional development which have not so far been perfectly articulated in the literature of reference on endogenous growth although there has been significant research so far into the success and failure of clusters the implications of these multiple research efforts fail to provide political decision makers and company managers with critical information about which mechanisms lie behind cluster success and also about how clusters survive and prosper the innovative approaches presented in this book on entrepreneurship human capital mobility and regional development have considerable potential to create new and original implications for decision makers and managers in terms of value added this book contributes to the literature by seeking answers to the following questions i is the growth and success of clusters over time due to concentration and transmission of business competences through spin offs located in a given regional space ii does increased density of job options outside the workplace contribute to increased mobility of human capital between firms located within clusters and so improve coordination in the local labor market iii do

2017-04-08

david weil economic growth 3rd edition

spin offs benefit from hiring workers from successful incumbents inasmuch as those workers are expected to perform better than other workers from different origins integrating theoretical frameworks empirical research and regional case studies from portugal spain norway and turkey the editors and contributors demonstrate that the regional dynamics of industry growth are strongly influenced by the mobility of employees towards new firms

Economic Development in the Third World 1989

why society s expectation of economic growth is no longer realistic economic growth and the hope of better things to come is the religion of the modern world yet its prospects have become bleak with crashes following booms in an endless cycle in the united states eighty percent of the population has seen no increase in purchasing power over the last thirty years and the situation is not much better elsewhere the infinite desire for growth spotlights the obsession with wanting more and the global tensions that have arisen as a result daniel cohen provides a whirlwind tour of the history of economic growth from the early days of civilization to modern times underscoring what is so unsettling today he examines how a future less dependent on material gain might be considered and how in a culture of competition individual desires might be better attuned to the greater needs of society

Economic Growth and Macroeconomic Dynamics 2004-05-31

english french german language dictionary of terms related to economics with particular reference to economic development economic growth and economic planning and the social implications thereof

Entrepreneurship, Human Capital, and Regional Development 2015-01-18

the financial crisis in advanced economies and its impact on developing countries has put the longer term agenda of development structural transformation of countries of their growth jobs poverty and distribution on the analytic and policy backburner day to day management of macro fundamentals in the global economy and the labour market have consumed decision makers with faltering gdp growth soaring unemployment and a resurgent threat of deflation without understanding and addressing the structural constraints and imbalances underpinning such global problems the world economy is doomed to experience an increasing number of crises and emerging dualisms between countries the aim of this book is to bring back a balance to the development debate by re focusing on the structural development challenges faced by developing countries the book develops a coherent analytical framework supported by a large body of new empirical evidence linking three core dimensions the structure of growth employment and their macro drivers then for each of these dimensions and relationships a variety of effective policies are also

identified and elucidated with the added granularity of country cases

The Infinite Desire for Growth 2020-12-08

Latin America is one of the most intriguing parts of the world. The region's illustrious history, culture, and geography are famous internationally, but in terms of economics, Latin America has been generally associated with problems for many. The combination of a resource-rich region and poor economic conditions has been a puzzle. This extensively revised and updated second edition of *Latin American Economic Development* continues to provide the most up-to-date exploration of why the continent can be considered to have underperformed, how the various Latin American economies function, and the future prospects for the region. The book addresses the economic problems of Latin America theme by theme, changes, and new features. In this new edition, it includes expanded coverage of how institutions affect economic growth in Latin America, many new boxes and questions for review and discussion, new material on how climate change affects the region, updated material to reflect the ongoing macroeconomic stability of the past decade, a new chapter on the political economy of Latin America. The book provides a comprehensive text for undergraduate economics courses on Latin America and is also suitable for use by students in other disciplines looking for a wide-ranging guide to the region. This book will continue to be an invaluable resource for undergraduates looking at Latin American economics, growth, and development.

economics third edition 1995

Written to provide students with the critical tools used in today's development economics research and practice, *Essentials of Development Economics* represents an alternative approach to traditional textbooks on the subject. Compact and less expensive than other textbooks for undergraduate development economics courses, *Essentials of Development Economics* offers a broad overview of key topics and methods in the field. Its fourteen easy-to-read chapters introduce cutting-edge research and present best practices and state-of-the-art methods. Each chapter concludes with an embedded QR code that connects readers to ancillary audiovisual materials and supplemental readings on a website curated by the authors. By mastering the material in this book, students will have the conceptual grounding needed to move on to higher-level development economics courses.

Dictionary of Development Economics 1969

Continuing his groundbreaking analysis of economic structures, Douglass North develops an analytical framework for explaining the ways in which institutions and institutional change affect the performance of economies, both at a given time and over time. Institutions exist, he argues, due to the uncertainties involved in human interaction; they are the constraints devised to

structure that interaction yet institutions vary widely in their consequences for economic performance some economies develop institutions that produce growth and development while others develop institutions that produce stagnation north first explores the nature of institutions and explains the role of transaction and production costs in their development the second part of the book deals with institutional change institutions create the incentive structure in an economy and organisations will be created to take advantage of the opportunities provided within a given institutional framework north argues that the kinds of skills and knowledge fostered by the structure of an economy will shape the direction of change and gradually alter the institutional framework he then explains how institutional development may lead to a path dependent pattern of development in the final part of the book north explains the implications of this analysis for economic theory and economic history he indicates how institutional analysis must be incorporated into neo classical theory and explores the potential for the construction of a dynamic theory of long term economic change douglass c north is director of the center of political economy and professor of economics and history at washington university in st louis he is a past president of the economic history association and western economics association and a fellow american academy of arts and sciences he has written over sixty articles for a variety of journals and is the author of the rise of the western world a new economic history cup 1973 with r p thomas and structure and change in economic history norton 1981 professor north is included in great economists since keynes edited by m blaug cup 1988 paperback ed

Three Essays on Economic Growth and Development 1992

in this volume leading modern economic historians show how analysis of past experiences contributes to a better understanding of present day economic conditions they offer important insights into major challenges that will occupy the attention of policy makers in the coming decades the seventeen essays are organised around three major themes the first of which is the changing constellation of forces sustaining long run economic growth in market economies the second major theme concerns the contemporary challenges posed by transitions in economic and political regimes and by ideologies that represent legacies from past economic conditions that still affect policy responses to new crises the third theme is modern economic growth s diverse implications for human economic welfare in terms of economic security nutritional and health status and old age support and the institutional mechanisms communities have developed to cope with the risks that individuals are exposed to by the concomitants of rising prosperity

The Three Regularities in Development 2018-06-06

after impressive growth of about 10 per annum for three decades china s visible signs of economic slowdown since 2008 have been subject to much contention what causes the deceleration what should we expect in an era of china s 6 growth this book answers

these questions in three parts although it is widely accepted that china can hardly continue its high speed growth model estimations for its future growth potential differ greatly the first part of this book predicts china s growth to 2050 which considers both cross country historical experiences and china s own demographic structure and employment participation features in the second part the book offers a comprehensive estimation of china s national and provincial total factor productivity tfp over the period of 1978 to 2014 based on comparable data it then analyzes the causes of china s economic slowdown from a productivity point of view finally this book correspondingly outlines policy recommendations including supply side structural reform and macroeconomic policy frameworks to effectively address the issue of decline in both labor and labor productivity growth this book will attract scholars and students of economics and china s economic studies

Latin American Economic Development 2015-12-14

finland south korea and the state of north carolina in the united states are three systems that successfully have harnessed higher education in their economic development initiatives common to the success of all these systems is amongst others the link between economic and education planning quality public schooling high tertiary participation rates with institutional differentiation labour market demand cooperation and networks and consensus about the importance of higher education for development linking higher education and economic development implications for africa from three successful systems draws together evidence on the three systems synthesises the key findings and distils the implications for african countries the project on which the book is based forms part of a larger study on universities and economic development in africa undertaken by the higher education research and advocacy network in africa herana herana is co ordinated by the centre for higher education transformation in south africa

Essentials of Development Economics 2015-03-19

capturing the overall development of the chinese economy this comprehensive book offers an introduction to one of the most astonishing economic growth stories of the last three decades the authors identify the key stages and unique features of china s development exploring its geopolitical impact on the world economy and in particular on the european union analysing factors such as education urbanisation and innovation this book highlights the reasons behind china s success in the international market and places a special focus on the country s energy policy by providing insights into such an important case of expansion and growth in international business this innovative book will be of interest to those researching asian business internationalisation and the chinese economy

Institutions, Institutional Change and Economic Performance 1990-10-26

access to new sources of energy and their efficient conversion to provide useful work have been key drivers of economic growth since the industrial revolution western countries now need to transform their energy systems and move away from the single minded pursuit of economic growth in order to reduce our carbon emissions and to allow the environmental space for other countries to develop in a more sustainable way achieving this requires understanding of the dynamics of economic and industrial change with appreciation of the dependence of economies on ecological systems energy and economic growth thus examines the links between three issues history of energy sources technologies and uses ecological challenges associated with the current dominant economic growth paradigm and the future low carbon energy transition to mitigate human induced climate change providing a historical understanding of the relevant connections between physical social and economic changes the book enables the reader to better understand the connection between their own energy use and global economic and environmental systems and to be able to ask the right questions of our political and business leaders this is a valuable resource for students scholars and policy makers with an interest in energy climate change and economic thinking

Economic Sanctions Reconsidered: History and current policy 1990

achieving economic growth is one of today s key challenges in this groundbreaking book michael best argues that to understand how successful growth happens we need an economic framework that focuses on production governance and skills this production centric framework is the culmination of three simultaneous journeys the first has been best s visits to hundreds of factories worldwide starting early as the son of a labor organiser and continuing through his work as an academic and industrial consultant the second is a survey of two hundred years of economic thought from babbage to krugman with stops along the way for marx marshall young penrose richardson schumpeter kuznets abramovitz keynes and jacobs the third is a tour of historical episodes of successful and failed transformations focusing sharply on three core elements the production system business organisation and skill formation and their interconnections best makes the case that government should create the institutional infrastructures needed to support these elements and their interconnections rather than subsidise individual enterprises

The Economic Future in Historical Perspective 2006-02-23

wider the world institute for development economics research established in 1984 started work in helsinki in 1985 with the financial support of the government of finland the principal purpose of the institute is to help identify and meet the need for policy oriented socio economic research on pressing global and development problems and their inter relationships wider s

research projects are grouped into three main themes hunger and poverty money finance and trade and development and technological transformation volume iii deals with the strategic options for the elimination of endemic hunger the topics covered include the comparative extent of hunger and deprivation in different parts of the world the influence of food production the interconnections between economic growth and public support the role of economic diversification in reducing vulnerability the potential impact of direct public provisioning on living standards and the politics of public action in addition to general analyses the book examines the international relevance of a number of specific country experiences in asia africa and latin america including those of china india sri lanka brazil kenya bangladesh and nigeria
