the establishment of nato posed the need for the soviet war machine to create a fast jet bomber capable of reaching targets throughout western europe and combatting the carrier task forces with which the us navy could throw its weight around the world the basic tu 16 which first flew in the mid 1950s was developed into nearly 50 versions adopted for various roles including nuclear capable bombers anti shipping missile strike aircraft torpedo bombers and minelayers numerous reconnaissance and ecm variants assorted development aircraft for testing new engines avionics and systems the tu 16 even found civil uses as a fast mailplane and a weather research rainmaking aircraft the badger as the bomber was known to the west served as the basis for the soviet union s first jet airliner the tu 104 the nearly 1 500 tu 16s built in the soviet union were an important factor in preventing all out military confrontation between the east and the west since the mid 1950s and until the 1980s the badger has been a regular picture on the pages of the western press snooping around western naval groups every now and then the type also had its share of hot wars getting its baptism of fire in the six day war of 1967

apart from three factories in the ussr the tu 16 was built under license in china as the h 6 and remains in service with the people s liberation army air force other foreign users were egypt indonesia and iraq all known versions are described and a full account is given of the tu 16 s operational career in the ussr and abroad during the cold war and in the days after that when many of the surviving badgers were used as target drones the book features many previously unpublished photos and a detailed production list

mixing is an attitude br when i think back to my best mixes regardless of their commercial success in each and every case i can only describe the experience as one in which i was working from deep within outside of any external forces i wasn t thinking i was doing i wasn t scared of what anyone would think i wasn t scared of failure all my decisions were made with confidence and once a judgment was made i didn t second guess myself i allowed the music to guide me and i based all of my mix decisions on nothing more than one simple criterion are the song and production doing what they re supposed to be doing br that sounds nice huh i mean that s the headspace you want to be in when you re mixing the problem is you can t get there if you re focused on all the wrong things and we re all susceptible to distraction and self doubt great mixing involves trusting yourself first and foremost and i can promise you that trust is downright infectious to everyone on your project br who am i br i m mixerman a gold and multi platinum mixer producer and recordist i ve been mixing professionally and at a high level for over three decades now and i can assure you great mixing isn t about manipulating sound it s about the decisions you make in regards to the music the balances and

how you use the arrangement to push the listener forward through the song this is accomplished through concrete strategies and techniques that i'm uniquely qualified to offer you to boost your confidence now you can spend the next decade mixing two songs a day to get there or you can get zen the art of mixing 2021 and i'll explain the thinking behind great mixing and then watch your confidence soar because there's a reason why this is my most popular work to date enjoy mixerman
