Observation and Participation in Early Childhood Settings *1997*

if your program is among the thousands using the evidence based pyramid model for promoting social emotional competence in infants and young children this is the one tool you need to make sure teachers are effectively putting it into practice developed by highly respected creators of the pyramid model for classrooms enrolling children 2 5 years of age the tpot tm is an in depth tool that measures how well teachers are implementing practices related to universal targeted and individualized supports a trained administrator conducts a classroom observation and teacher interview uncovering detailed information about the quality of 14 key teaching practices noting red flags that indicate areas for immediate support and observing how teachers respond to challenging behaviors tpot tm results show schools which practices are being implemented successfully and what teachers need to focus on to ensure positive social emotional outcomes for young children tpot tm helps schools support effective implementation of the proven pbis based pyramid model promote social emotional competence in young children implement strategies to prevent and address challenging behavior compare implementation across classrooms teachers and programs identify where teachers need extra professional development and support guide coaching

efforts to spot them at a glance developers lise fox ph d mary louise hemmeter ph d patricia snyder ph d areas assessed teachers' implementation of key practices that promote social emotional competence such as responsive interactions classroom preventive practices social emotional teaching strategies and capacity to provide individualized interventions age range for early childhood classrooms that serve children 2 5 years of age who conducts it a trained administrator where it's conducted early childhood education classrooms and programs time to complete 2 hours for the classroom observation and 15 to 20 minutes for the interview with the teacher see which domain of school readiness in the head start child development and early learning framework this tool addresses this set includes the tpot manual and one package of tpot forms

Take a Look 1994

a cognitively oriented preschool curriculum

Learning Through Child Observation, Third Edition 2016-04-21

being a preschool teacher means chaos all day i know because i have been a preschool teacher for 15 years and have always struggled to keep my anecdotal observations organized and in one place clipboards sticky notes loose papers and folders have all been unsuccessful keeping observations and data at your fingertips for quick reference is the key to successful record keeping in the classroom 8 5 x 11 book has spacious layout for each observation includes space for date student time of day notes and quotes make report writing assessments and lesson planning easier and quicker no bulky spiral bound or hardcover makes it travel friendly to use during field trips use for homeschooling creative curriculum high scope reggio emilia montessori and other early childhood education curriculum models

Teaching Pyramid Observation Tool (TPOT(tm)) for Preschool Classrooms Set, Research Edition 2013-12-18

this is a book about the process of finding user friendly and purposeful ways of observing and planning that will help those who are working with young children in a variety of settings to look with insight at children providing what they need in order to develop and learn optimally by examining the historic background of observing and planning and describing examples of good practice in different group settings this book will help to monitor a child's progress what is needed now and to work out what is needed next the real life case studies from various settings including day care nursery school primary school private sector and soweto examine different observation techniques looking at their strengths drawbacks and use in everyday practice examples from the uk and internationally illustrate the history and importance of observation in a range of contexts while a glossary clearly explains the key terminology all the examples given in this book can be used with different national framework documents worldwide bearing in mind however the authors belief that curriculum frameworks must be used as a resource and never as a limiting straitjacket drawing on key theory and research the book's chapters cover flexible planning record keeping working with parents using technology full colour photographs illustrations and useful charts and diagrams make this an accessible and engaging resource that will no doubt be invaluable to any early years practitioner this book was originally published as getting to know you part of the 0 8 series

Young Children in Action 1979

the purpose of this study was to compare the level of behavioral understanding of preschool children of mothers who had observed in the nursery school with the level of behavioral understanding of mothers who had not observed behavioral understanding was defined as a mother's degree of awareness of the factors and forces which contribute to the actions and or responses of a child in given situations the hypothesis to be tested was that observing in the nursery school does not affect the mothers understanding of the behavior of preschool children twenty two mothers who had a child enrolled in the nursery schools at oregon state university participated in this study the mothers were randomly divided into two groups a control and an experimental group the experimental group observed in the nursery school for a period of three weeks a total of six hours of observation at no time during the study were the mothers in the control group allowed to observe during the course of the study no mother in either group was allowed to discuss with the teachers or students any subject relevant to children and their behavior a measure of the mothers level of understanding was determined by the film test for understanding behavior fub the purpose of the test is to give an objective measure of 1 understanding of guidance principles as they relate to specific behavior 2 knowledge of expected behavior and development in three and four year old children and 3 sensitivity to the feelings of children the test consists of ten one minute episodes of behavior of three and four year old children which were filmed in the nursery school specific items have been developed for each episode and the response to each item is given in terms of a five point agreement disagreement continuum agree agree with hesitation uncertain disagree with hesitation and disagree the scores range from 2 for the most correct to 2 for the least correct response the fub was administered twice to both groups of mothers 1 before the experimental group began their observations and 2 after the experimental group completed their three week period of observation the scores for each test were computed by two different procedures first a total score was computed which showed the scores for the three subscales of the test 1 knowledge of guidance principles 2 knowledge of expected behavior and development and 3 sensitivity to the feelings of children second each test was scored by a procedure which discriminates between those having an extensive background in child development and psychology medium high scale and those having limited academic work in these subjects low medium scale the mothers having two or fewer courses in child development and psychology were considered to have limited academic course work and those mothers having three or more courses in these subjects were considered to have an extensive background a t test of significance was used to determine the difference of scores between the two groups before and after observation the results did not show a significant difference of scores at the .05 level of confidence this was true for both scoring procedures these findings indicate a need for further research in establishing the reliability and validity of the fub and in the use of observation as a method of parent education

Preschool Teacher 2019-08-10

the power of observation explores the vital connection between observing and effective teaching much more than just a set of skills observation is a mind set of openness and wonder that helps teachers and caregivers get to know more about each child in their care the link between observation and building relationships is an important theme of this book the authors share their own experiences and those of many others to illustrate how observation helps teachers and caregivers become more effective in the child care center preschool family child care home or elementary classroom it offers guidelines for effective observation and specific strategies to help you refine your observation skills and transform observing into an integral part of your teaching this second edition includes expanded guidance on applying what you learn from observation into your daily practices and a new study guide this study guide was developed based on recommendations from numerous university and community college professors who use the book as the textbook for their courses we are pleased that naeyc has chosen to make this book a 2007 comprehensive member benefit

Observing Young Children *2014-11-13*

updated to take account of 2012 eyfs requirements and includes a cd rom of sheets and examples of planning and observation

The Revised EYFS in practice 2013-05-23

this dissertation an observation scale for screening preschool children with mild autism spectrum disorders by hoe chi angel au 曾 曾 曾 was obtained from the university of hong kong pokfulam hong kong and is being sold pursuant to creative commons attribution 3 0 hong kong license the content of this dissertation has not been altered in any way we have altered the formatting in order to facilitate the ease of printing and reading of the dissertation all rights not granted by the above license are retained by the author abstract while a stable diagnosis of autism spectrum disorders can be made as early as 2 years of age the diagnosis of mild asd cases are usually not made until primary school age or much later and yet it is these milder cases that can benefit the most from early intervention the present study aimed at pushing the identification of mild asd children earlier to preschool age a review of current screening tools revealed that they were not effective in identifying milder asd variants one reason perhaps is that the existing tools rely primarily on parental reports note that young children with mild asd often function adequately interacting with an adult who knows them well they typically face more difficulty in free play with other children parents as a result may not be in a good position to detect milder asd the present study therefore took a very different approach from existing screening tools by developing a more objective scale based on observation by of peer interaction in preschools considering peer interaction deficits are central for asd and deficits of these milder individuals might be more obvious in a setting that tax their social skills a screening tool based on peer interaction observation in preschool namely the structured classroom observation scale scos was thus developed drawing on existing screening tools and experts input 84 items were compiled and pilot tested an initial psychometric study of the scale was conducted using a community sample with 304 preschoolers aged 3 and 4 from four english language international schools in hong kong the initial 84 item version was trimmed substantially to result in a user friendly 13 item observation scale with good psychometric properties the final scos includes 3 items depicting self regulation challenges and 10 items describing difficulties in peer interaction the initial psychometric study using a community sample indicated substantial interrater reliability $u = .76$ and acceptable test retest reliability $icc = .72$ the average agreement for individual items was less satisfactory $t = .40$ using latent class analysis the present scale delineated the children into 4 groups typical shy behavioral and high risk of asd a subsequent validity study $n = 186$ comparing the scos with ados scores showed that the class membership of the children based on scos predicted their ados results after controlling for age and gender children from the high risk group were found to have significantly higher calibrated ados severity scores than the other 3 groups and their mean ados scores $i = 8.18$ were above the cutoff for asd on the ados a 9 month follow found more reports of parental concerns in the high risk group with ados scores above the cutoff discriminant validity of the scos was demonstrated between the scale and head start competence scale parent version in contrast to the usual portrayal of active but odd stereotypical children with asperger syndrome the high risk group identified by the scos consisted of children with infrequent interfering behaviors they were relatively passive but not necessarily odd during social interactions which might perhaps explain why early identification was difficult the current scale also identified another two groups of children shy group and behavioral group which will require longitudinal follow up to ascertain educ

Developing the Observing Eye *2010-02-02*

an observational assessment tool for children aged 2 1 2 to 6 years designed to be used in all early childhood programs measures children s progress in six broad categories critical for school success language and literacy mathematics and science initiative social relations creative representation and movement and music
