2015-06-15

the drive towards environmentally friendly buildings and infrastructure has led to a growing interest in providing design solutions underpinned by the core principles of sustainability to balance economic social and environmental factors design economics for the built environment impact of sustainability on project evaluation presents new directions reflecting the need to recognise the impact of climate change and the

importance of sustainability in project evaluation the aim is to provide a new approach to understanding design economics in the context of the changing policy environment legislative and regulatory framework and increasing economic environmental and social pressure as result of the sustainability agenda the book follows a structured approach from theories and principles in the earlier chapters to the practical applications and emerging techniques focusing on value and social economic and environmental considerations in making design decisions it starts with the policy context building on various theories and principles such as capital cost value of design and resource based theories the new rules of measurement nrm to explore cost planning the relationship between height and costs key socio economic and environmental variables for design appraisal eco cost value ratio evr whole life theory and the treatment of carbon emission as external costs productivity and efficiency fiscal drivers and legal framework for carbon reduction procurement and allocation of risks in contracts case studies practical examples and frameworks throughout reinforce theories and principles and relate them to current practice the book is essential reading for postgraduate students in architecture building and quantity surveying and is also a valuable resource for academics consultants and policy makers in the built environment

Design Economics for the Built Environment

2019-03-07

while our cities are full of incredible engineering feats most of us live with little idea of what goes into creating the built environment let alone how a new building goes up what it is built upon or how it remains standing in this book roma agrawal uncovers the astonishing science behind her profession each of the eight chapters will tackle a great engineering challenge how we keep a building from falling down or how a bridge is built to span vast distances explaining solutions from modern times while reaching back to the romans and other ancient cultures who developed techniques still used today interweaving science history illustrations and personal stories built offers a fascinating window into a subject that makes up the foundation of our everyday lives

Built

2011-03-10

life cycle assessment enables the identification of a broad range of potential environmental impacts occurring across the entire life of a product from its design through to its eventual disposal or reuse the need for life cycle assessment to inform environmental design within the built environment is critical due to the complex range of materials and processes required to construct and manage our buildings and infrastructure systems after outlining the framework for life cycle assessment this book uses a range of case studies to demonstrate the

innovative input output based hybrid approach for compiling a life cycle inventory this approach enables a comprehensive analysis of a broad range of resource requirements and environmental outputs so that the potential environmental impacts of a building or infrastructure system can be ascertained these case studies cover a range of elements that are part of the built environment including a residential building a commercial office building and a wind turbine as well as individual building components such as a residential scale photovoltaic system comprehensively introducing and demonstrating the uses and benefits of life cycle assessment for built environment projects this book will show you how to assess the environmental performance of your clients projects to compare design options across their entire life and to identify opportunities for improving environmental performance
