Musculoskeletal Assessment 2013 it was at a seminar in new york city in a hotel in gramercy park around 1990 that i first saw a demonstration of a muscle response test and my belief system was turned on its head the demonstration was given by dr jose rodriguez dc who was one of the first diplomates of applied kinesiology i was really impressed and i could see there was so much more to reality than i could have imagined as far as i know what i ll be discussing is not taught at any conventional school in this country or in any other country for that matter all the instruction i mentioned above was outside of mainstream academia i should also say that it is certain that none of teachers mentioned above will agree with everything i ve written in this book certainly much of what i ve written i ve learned from them but anything said here that is not correct should be attributed to me alone the only blame they deserve is for getting me intensely interested in this work i ve used muscle response testing in my practice now for over twelve years in the early days not surprisingly none of my new clients had ever seen muscle response testing and for most it seemed too crazy to be believed and few would return after the first office visit now it s still difficult for many of my clients to believe but it s not at all unusual for new clients to have already seen or even experienced muscle response testing if you re new to this it will probably be difficult for you also not to see this as all nonsense even if you re not seeing this for the first time and you re already a believer i m sure much of what i ll be describing here will also be new to you author
