a thorough knowledge of the hows and whys of building assemblies is a prerequisite to effective architectural design architectural detailing creating drawings that accurately describe particular assemblies within a design is essential to controlling the total building process this book provides students with a solid grounding in building assemblies followed by step by step guidance on how to develop effective professional architectural details which are essential to becoming a skilled architectural detailer more than 1 000 expertly crafted design details including over 400 new cad drawn 3 d images details and photographs help illustrate the concepts presented while establishing a high level of detailing excellence to which students will aspire

Distributed Computing and Networking

2007-03-05

as globalization has brought about new concerns and responsibilities for business particularly in the realm of human rights many multinational corporations mnc operating in asia have argued that such rights are the responsibility of government however as globalization continues to improve market access for mncs it increasingly exposes them to new forms of transnational social movements and as a result the private sector has emerged as one of the central stakeholders in the region s human rights dialogue taking three of asia s fastest emerging economies cambodia china and thailand as its starting point corporate social responsibility and human rights in asia explores the business case for corporate social responsibility human rights and anti corruption in the region in doing so it examines how industry perceives human rights and corruption within the corporate social responsibility csr paradigm and builds on the argument that the csr regime is a socially constructed concept drawing on interviews with key stakeholders including business leaders nongovernmental

organizations international organizations and government officials robert hanlon argues that industry perceives human rights as outside their sphere of influence that divergent stakeholder interests are side lining the human rights debate and that human rights are increasingly ignored in the quest for profit maximization this leads to the conclusion that human rights and corruption will remain peripheral business issues until stakeholders find new ways of creating space for csr engagement and business actors will continue to marginalize the human rights issue so long as governments in the region let them this interdisciplinary book draws on political science business and sociological perspectives and as such will be of great interest to students and scholars working across the fields of asian business corporate social responsibility and business ethics human rights and international political economy

The Professional Practice of Architectural Detailing

1999

the internet is an empowering force for the world s consumers connecting them with their families governments communities and markets both nearby and far broadband access is needed for them to fully take advantage of all that the internet offers as such strong consumer protection for consumers of broadband services is vital not only to enjoy the internet itself but to fully participate in the many other areas of modern life to which it connects them consumer organisations have a vital role to play in promoting high consumer protection standards for broadband providers and in holding them to account when they fall short this manual is designed as a primer for consumer advocates wishing to enter the battle for fair and high quality broadband services but uncertain about where to start it begins with an overview of the practice of consumer advocacy including simple guidelines for effective campaigning with particular attention to key areas such as communications and partnerships it moves on to explain the technical and policy issues that surround broadband services including traditional consumer protection issues such as unfair contract terms and complaint handling but also broader issues such as privacy and network neutrality finally the manual outlines three campaign ideas responding to problems that ci members uncovered through research conducted in 2011 these are a broadband disclosure statement to address the opacity of broadband contract terms a don t lock me in campaign against providers who stop consumers from shopping around for the best deal and a campaign to provide broadband consumers with better independent resolution

services included are template resources from which members can cut and paste for use in their own campaigns leading we hope to concrete improvements in the quality and fairness of broadband services for consumers around the world
