finally available a high quality book of the original classic edition of automatic pistol shooting together with information on handling the duelling pistol and revolver it was previously published by other bona fide publishers and is now after many years back in print this is a new and freshly published edition of this culturally important work by walter winans which is now at last again available to you get the pdf and epub now as well included in your purchase you have automatic pistol shooting together with information on handling the duelling pistol and revolver in epub and pdf format to read on any tablet ereader desktop laptop or smartphone simultaneous get it now enjoy this classic work today these selected paragraphs distill the contents and give you a quick look inside automatic pistol shooting together with information on handling the duelling pistol and revolver look inside the book as soon as you can shoot well enough to know whether bad shots are the fault of the sighting of the revolver or of your own holding you can sight the pistol properly for yourself and in this way you can do the sighting much more accurately and with greater nicety than by taking it to a gunmaker and saying alter the sights to shoot three inches higher and two to the left at twenty yards and open the u a little etc i have made bulls when the target was almost out of sight in fact i did so in my record shoot at bisley where there used to be such a competition but this is a bad habit to contract and a risky sort of shot as it is almost sure to be too far behind or even to be fired into the shield in front of the target though of course if you have not a good aim it is better to delay as long as possible rather than to shoot earlier with a bad aim

excerpt from automatic pistol shooting together with information on handling the duelling pistol and revolver though my last edition of hints on revolver shooting was published only four years ago i find it now necessary owing to the advance of the automatic pistol to revise it thoroughly and to add new chapters till quite recently the automatic pistol had many defects both as to balance and as to safety chiefly in the latter respect so that only a very careful expert could handle one without danger to the public and to himself this has now been altered and with safety bolts and external hammers several automatic pistols are quite safe for the use of experts they are still very dangerous in the hands of ignorant persons a revolver is dangerous enough in such cases but the automatic is much more so i shall try to explain how any one possessing mechanical knowledge can by observing certain precautions safely carry and shoot an automatic pistol about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection

Helps and Hints how to Protect Life and Property 1835

acquiring the ability to accurately shoot a pistol is no simple matter one should not assume that the art of advanced pistol marksmanship is fully realized immediately upon reading a training manual on the fundamentals and techniques of pistol shooting nor completely understood after having received a few hours of advice and instruction from a qualified coach or expert shooter to become a top pistol shooter and able to produce consistently high scores one must learn to perform all the fundamentals of shooting acquire certain definite habits achieve flawless coordination and above all have a capacity for the intense concentration essential to exercising a high degree of mental control for this one must train it is difficult if not impossible to establish a universal system of training in pistol marksmanship which will cover all cases one that can be adapted to each shooter s technique or special need training pistol shooters requires an individual approach there is no single pattern or system for the organization of training that will entirely meet the individual requirements of all competitors nor can one ever be expected this is the reason knowledgeable coaches take the peculiarities of an individual such as experience degree of preparation and fitness and other items into account they use these and by relying on their own experience devise a training program which allows special consideration for each shooter s capabilities in spite of the difference in details technique or method

there is much that is common to the training of advanced marksmen that in the opinion of leading coaches and shooters applies to everyone without exception this manual endeavors to present in a detailed comprehensive manner these universal applications advanced pistol marksmanship training must of necessity avoid the involved and exceedingly complex because it is an activity whose participants form a great cross section of our nation

this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1835 edition excerpt in a strange place waked out of a sound sleep and under the influence of terror besides would be extremely difficult an anticipation that is not overrated since everybody must have experienced and recollect the perplexity which attends our first waking when sleeping in a strange room and the difficulty we labour under in recollecting its position and the situation of the doors windows c i used to have a stick which i had made on purpose and which enabled me almost impregnably to fasten a door the ferrule which screwed off and on had a stout but very sharp pointed pin right through its centre by means of one female screw to the ferrule and two male screws to the part carrying the pointed pin at one end and a blunt piece of steel at the other it could be changed from a common walking stick into one of formidable defence on account of having a sword like point this stick when placed against a door with the sharp point out and as before directed made it very fast for by merely turning the screw part a little the stick not only elongated that much but by thus forcing the point into the floor it strained against the door upwards to resist its being opened even when attempted with violence i found it necessary however to have the handle part loaded with some lead to assist in the recover of the point the better to enable me to use it smartly as a weapon of defence for it proved rather too heavy after this addition too heavy to my fancy at least being partial to a light point because the severity of a cut or blow should not be derived from the weight of a stick nor from the motion of the arm but from a supple wrist and a corresponding contraction of the last three fingers not only is a very quick
