in it roger scruton focuses on the ideas and arguments which have attracted him to the subject and which have engaged his attention he attempts to show how philosophy is relevant not just to intellectual questions but to life in the modern world philosophy the love of wisdom can be approached in two ways by doing it or by studying how it has been done the second way is familiar to university students who find themselves confronted by the largest body of literature ever devoted to a single subject this book follows a more ancient pattern it attempts to teach philosophy by doing it although the author refers to the great philosophers and in particular to kant and wittgenstein who have been the greatest influence on his thinking he gives no reliable guide to their arguments the book makes no attempt to give either a history or a survey of the subject instead it offers itself as a guide to the reader who is prepared to make a personal venture into philosophy its aim is to bring philosophy to life
