The new AFCAT Guide with 14 Year-wise Past Papers (2011 - 2018) 5th Edition 2008-04-15 the world viewed from the inside the world defined and determined according to its intelligible character it would be will to power and nothing else cryptic passages like this one from section 36 of beyond good and evil have been the source of much intrigue speculation and puzzlement in the nietzschean secondary literature this passage in particular

along with many others have sparked a slew of questions in recent decades such as what is the will to power is will to power a metaphysical principle is it an empirical assertion or is will to power merely a hypothesis that nietzsche himself rejected although asked ad nauseam in the literature the multitude of answers given to the above questions never seem to satisfy in this book brian lightbody shed light on nietzsche s most famous esoteric teaching by explaining what the will to power is and what it denotes he then demonstrates how will to power may be naturalized in an attempt to show that the doctrine is epistemically and empirically defensible finally he uses will to power as a philological key of sorts to unlock nietzsche s philosophy as a whole by showing that his ontology epistemology and ethics are only properly understood once a coherent naturalized rendering of will to power is produced
