1988

this book is about making machine learning models and their decisions interpretable after
exploring the concepts of interpretability you will learn about simple interpretable models
such as decision trees decision rules and linear regression later chapters focus on general
model agnostic methods for interpreting black box models like feature importance and
accumulated local effects and explaining individual predictions with shapley values and lime
all interpretation methods are explained in depth and discussed critically how do they work
under the hood what are their strengths and weaknesses how can their outputs be interpreted
this book will enable you to select and correctly apply the interpretation method that is most
suitable for your machine learning project

2018-10-09 the basics of information visualization that teaches non-programmers how to use data

**the joy of home distilling the ultimate guide to making your own vodka whiskey rum
brandy moonshine and more the joy of series**

advanced data mining and visualization techniques to design insightful visualizations in the age of big data the tools of information visualization offer us a macroscope to help us make sense of the avalanche of data available on every subject this book offers a gentle introduction to the design of insightful information visualizations it is the only book on the subject that teaches nonprogrammers how to use open code and open data to design insightful visualizations readers will learn to apply advanced data mining and visualization techniques to make sense of temporal geospatial topical and network data the book developed for use in an information visualization mooc covers data analysis algorithms that enable extraction of patterns and trends in data with chapters devoted to when temporal data where geospatial data what topical data and with whom networks and trees and to systems that drive research and development examples of projects undertaken for clients include an interactive visualization of the success of game player activity in world of warcraft a visualization of 311 number adoption that shows the diffusion of non emergency calls in the united states a return on investment study for two decades of hiv aids research funding by niaid and a map showing the impact of the hivenyc learning network visual insights will be an essential resource on basic information visualization techniques for scholars in many fields students designers or anyone who works with data

Visual Insights

2014-01-24

dataviz the new language of business a good visualization can communicate the nature and potential impact of information and ideas more powerfully than any other form of communication for a long time dataviz was left to specialists data scientists and professional designers no longer a new generation of tools and massive amounts of available data make it easy for anyone to create visualizations that communicate ideas far more effectively than generic spreadsheet charts ever could what s more building good charts is quickly becoming a need to have skill for managers if you re not doing it other managers are and they re getting noticed for it and getting credit for contributing to your company s success ingood charts dataviz maven scott berinato provides an essential guide to how visualization works and how to use this new language to impress and persuade dataviz today is where spreadsheets and word processors were in the early 1980s on the cusp of changing how we work berinato lays out a system for thinking visually and building better charts through a process of talking sketching and prototyping this book is much more than a set of static rules for making visualizations it taps into both well established and cutting edge research in visual perception and neuroscience as well as the emerging field of visualization science to explore why good charts and bad ones create feelings behind our eyes along the way berinato also includes many engaging vignettes of dataviz pros illustrating the ideas in practice good charts will help you turn plain uninspiring charts that merely present information into smart effective visualizations that powerfully convey ideas
